PROFESSIONAL SUMMARY

Passionate Full Stack Developer with experience building responsive and scalable web applications using the MERN stack. Skilled in creating user-friendly interfaces, REST APIs, authentication systems, and database management. Dedicated to writing clean code and continuously learning modern web technologies.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+)
- **Frontend Skills :** HTML5, CSS3, Tailwind CSS, React.js, Next.js, HeroUI
- **Backend Skills :** Node.js, Express.js, REST APIs
- **Authentication:** JWT, Better Auth
- **Database:** MongoDB
- **Tools & Platforms :** Git & GitHub, VS Code, Figma
- **Soft Skills:** Problem Solving, Attention to Detail, Communication, Adaptability

PROJECTS

1. Courtify

[Live Demo](#) | [GitHub-Client](#) | [GitHub-Server](#)

Courtify is a full-stack sports facility booking platform built with the MERN stack. It allows users to explore sports venues and book available time slots based on date and time. It also includes secure authentication, role-based access, and complete booking management for users and facility owners. This project was built using **Next.js**, **Node.js**, **Express.js**, and **JWT authentication**.

Key Features:

- Designed a fully responsive, user-friendly interface ensuring seamless accessibility across all devices
- Optimized the booking process by adding search and filter functionalities for sports venues
- Developed detailed facility pages with smooth loading states and robust error handling

2. Book-Borro

[Live Demo](#) | [GitHub](#)

Book Borro is a modern full-stack web application where users can browse, search, and filter books by category and easily borrow them through a secure authentication system. This project was built using **Next.js**, **Node.js**, and **BetterAuth** for secure authentication and smooth full-stack functionality.

Key Features:

- Designed a visually engaging interface with smooth animations to enhance user engagement
- Developed a modern library management system enabling secure book browsing and borrowing functionality
- Designed a fully responsive interface for all devices (Mobile, Tablet, Desktop)

3. KeenKeeper

[Live Demo](#) | [GitHub](#)

KeenKeeper is a responsive web application designed to help you stay connected by tracking your interactions with friends, such as calls and texts. It provides insightful analytics and a timeline to help you effectively manage and maintain your friendships over time. This project was built using **Next.js**, **Tailwind CSS**, **JavaScript (ES6+)**.

Key Features:

- Designed intuitive individual friend profile pages for seamless navigation and information access
- Implemented a tracking system for calls, texts, and video chats.
- Implemented interactive charts to visualize communication insights and trends

EDUCATION

BSS (Honours) in ECONOMICS (2023 - Present)

Govt. Debendra College , Manikganj
